

AVINASH P

B.E. Computer Science & Engineering Student | 2nd Year

Chennai, Tamil Nadu anbirkuriya.avinash@gmail.com

PROFESSIONAL SUMMARY

Second-year Computer Science and Engineering student at S.A. Engineering College, building skills in programming, web development, databases, and core computer science. Developing a smart-agriculture project while exploring software development and artificial intelligence; brings a practical problem-solving approach and a strong learning mindset.

EDUCATION

B.E. Computer Science & Engineering — 2nd Year

S.A. Engineering College | Chennai, Tamil Nadu | Currently pursuing

TECHNICAL SKILLS

Programming Languages: C, C++, Java, Python

Tools & Platforms: Git, GitHub, VS Code

Software & CS Topics: Data Structures, Object-Oriented Programming (OOP), Algorithms, Problem Solving

Web Technologies: HTML, CSS, JavaScript

Database: SQL

Technical Interests: Artificial Intelligence, Web Applications, Smart Technology

PROJECTS

MARUDHAM 360 — AI-Powered Smart Agriculture & Farmer Support Platform

[Live project](#) | [Demo video](#) | AI-powered · Satellite-enabled · Offline-first

Smart agriculture platform concept focused on supporting farmers across crop planning, cultivation, monitoring, harvesting, post-harvest management, market access, and farmer support.

- **Project focus:** Organizing a farmer-support platform around practical agriculture workflows and support needs.
- **Features described:** AI crop intelligence, smart farm management, satellite and location intelligence, and crop lifecycle management.
- **Additional scope:** Market and finance, post-harvest support, local agriculture network, farmer community, and voice support.

LEADERSHIP & PERSONAL DEVELOPMENT

NCC Cadet

Discipline, leadership, teamwork, responsibility, confidence, and time management.

Strengths: Logical problem solving, adaptability, collaboration, leadership, and creative thinking.

Sports

Team spirit, consistency, dedication, perseverance, and goal-oriented thinking.

RELEVANT COMPUTER SCIENCE TOPICS

Data Structures · Object-Oriented Programming · Algorithms · Problem Solving
